Let's start with some of the basics about LED lighting:

**How LEDs work**
To produce light very efficiently, an electrical current passed through semiconductor material illuminates the tiny light sources we call LEDs. The heat produced is absorbed into a heat sink.

**Saving energy with LEDs**
According to the Department of Energy, "LEDs offer the potential for cutting general lighting energy use nearly in half by 2030, saving energy dollars and carbon emissions in the process.

**Expected Life of LEDs**
Good-quality white LEDs in well-designed fixtures are expected to have a useful life of 30,000 to 50,000 hours or longer.

**Measuring color in LEDs**
Color appearance is communicated using correlated color temperature (CCT) on the Kelvin (K) scale. For most interior lighting applications, warm-white (2700K to 3000K) is preferred.

**Inherent benefits of LEDs**
LEDs have many unique, inherent benefits including long life, ease of maintenance, resistance to breakage, lack of infrared or ultraviolet emissions, and instant-on performance.

With more and more homeowners completing renovations in 2014 and the recent phase out of certain light sources, it seems everyone is talking about LED lighting. These energy-efficient sources provide numerous benefits—from energy savings to aesthetic appeal.
The LED flush mount series uses an intuitive snap-in system that makes flush mount installation easier than ever. Simply, install adapter onto junction box, then snap into place using the flush mount clip.

### FEATURES
- Flicker free dimming with many ELV dimmers
- Wet location listed
- 3000K color temperature
- 90 CRI
- 120v input voltage AC
- TM-21 60,000 hr. life
- 17w: 1035 delivered Lumens, 60 Lumens/watt
- 12w: 630 delivered Lumens, 52.5 Lumens/watt
- 10.5w: 670 delivered Lumens, 63.8 Lumens/watt
- CA Title 24 Compliant

### EASY INSTALLATION
1. Attach snap-in adapter on junction box.
2. Connect wires.
3. Snap into place with the flush mount clips.

With the rapid advancement of lighting technology, LEDs are quickly surpassing the efficiency of more traditional lighting, including fluorescent and incandescent sources. Progress Lighting offers LEDs that meet strict requirements for maximum energy savings and superior performance.

When you select a high-quality LED fixture, you can expect a significant ROI from an energy conservation standpoint.

Here are some of the energy saving benefits of LEDs from Progress Lighting:

**LED sources use at least 75% less energy than incandescent lighting,** allowing homeowners to save on operating expenses.

**LEDs last 35 to 50 times longer than incandescent sources** and approximately 2 to 5 times longer than fluorescent lighting. This means less bulb maintenance.

**LEDs do not produce heat like traditional sources,** reducing cooling costs. Traditional incandescent bulbs waste 98% of the energy they consume on heat.

LED Strips

Hide-A-Lite 4 LED Tape lighting for under cabinets and coves. Add aesthetic, energy efficient and functional lighting in the most used areas of your home: kitchens, utility rooms, laundry rooms, wet bars, display cases.

HOW TO USE

Mount securely under cabinets with Hide-a-Lite’s durable adhesive backing. Follow four simple steps:

1. **Choose a Tape Length**
   - Select LED tape strip length. Hide-a-Lite offers 2"L, 60"L size options. Mounting clips are included. (Install in rows of two or more to aid in task lighting or enhance lighting effects.)

2. **Select Transformer**
   - Progress Lighting’s 24V transformer emits no audible noise, is moisture and shock resistant and employs automatically resetting short circuit protection. Also it is dimmable with an electronic low-voltage dimmer.
   - **Hard wire:** 100w 24V zero load transformer
   - **Field cuttable:** at every 2" to end of run.
   - **High power factor:** >95%
   - **Maximum operating temperature:** -20° C to +90° C
   - **Sound rated A:** emits no audible noise
   - **CETL Listed damp location**

3. **Use Connectors to Customize Project**
   - **Y CONNECTOR**
     - Three-way connector forHide-a-Lite 4 LED tape (P7040, P7041 and P7042) with 1 male and 2 female connection points.
     - Size: 4-1/4" dia., 3/16" ht.
   - **L CONNECTOR**
     - 90° connector for connecting sections of tape (P7040, P7041 and P7042) on corners.
     - Size: 1-5/16" L, 1-3/8" W.

4. **Complete the Look**
   - **End caps to terminate run of LED tape.** Includes one cut end cap and one male end cap. For use when tape has been cut at end of run.

Direct Wire and Linkable, with long-life LED’s

**Electrical**
Each fixture includes 120V dimmable electronic power supplies rated for long-life continuous use. An on/off rocker switch is included.

**Lamping**
70% lumen maintenance over 35,000 hours. 3000K, 80+ CRI.

**Construction**
Extruded aluminum frame, polycarbonate end plates match frame finish. Tempered micro-prismatic glass lens.

**Linkable**
The system can be powered from a single location using the P8740 direct-wire junction box (each fixture can also be direct-wired individually). Using the HAL3 linking cables (P8733-P8735, P8737, P8738), the fixtures can be linked together to form a continuous row of illumination. (Note: The linking cables can be used with or without the use of the P8740 junction box).

**Dimming**
Smooth and continuous dimming on many incandescent dimmer switches (Note: Reference dimmer manufacturer’s minimum load requirements for dimmer switches). (Except P7002)

Incorporating LEDs Into Your Home Design

Progress Lighting makes switching to LEDs easy by offering a variety of options—from statement decorative fixtures to subtle accent lights. Here are four ways you can use LED lights in your home.

Recessed Lighting: Replacing recessed fixtures with LED sources is an easy way to use LEDs to create beautiful ambient lighting. Check out our previous post on the Basics of Recessed Lighting for tips on choosing and installing recessed fixtures—from sizing to spacing.

Accent Lighting: LED sources can add visual interest to any room of the home through accent illumination. Try using an LED step light along a walkway, stairs or on the side of a kitchen island.

Task Lighting: Consider adding under cabinet lighting to enhance task or work areas. Progress Lighting’s LED under cabinet series, or LED tape light, can be used to brighten kitchen counter spaces and improve functionality.

Decorative Lighting: With energy efficiency on the rise, more decorative fixtures have begun to incorporate LED sources. For example, the Progress Lighting Bingo collection comes with replaceable LED modules in a bold and beautiful design.

Outdoor Solutions

Endorse celebrates the traditional form of a gas-powered coach light with illumination from an LED source. Die-cast aluminum, powder coated frame with clear beveled glass. To add a decorative element, a fluted frosted glass column is offered as an accessory.

Outdoor LEDs are very popular due to some key advantages over other light sources. Some of these include:

**Safety:** Because LEDs do not produce an exceptional amount of heat like other landscape and outdoor options, homeowners can be at ease knowing their outdoor LED lights will illuminate their property with minimum fire risk. Additionally, children playing in the yard are not at risk for burns due to the low temperature compared to other light sources that can get very hot.

**Energy:** The energy saving benefits are even more applicable to exterior settings since outdoor lights are often left on for hours at a time.

**Maintenance:** Outdoor lights can be difficult (and time consuming) to replace, especially for lights on a roof. An LED lamp can last up to 20 years, making LEDs an extremely low maintenance solution.

Outdoor LEDs can be used in a variety of ways, including:

**Down Lights:** Shine LED down lights on areas ideal for outdoor entertaining. Recessed LED fixtures create a comfortable environment and add to your home’s safety and security.

**Path Lights:** Guide guests along exterior pathways and steps using LED path lights.

**Spotlights:** LED spotlights can be used to highlight architecture, gardens and key focal points of your landscape design. Spotlights also add visual intrigue to exterior areas, boosting curb appeal.

**Wall Lanterns:** Like down lights, LED wall lanterns contribute to the mood of outdoor living areas. Make guests feel at ease in your outdoor space by positioning wall lanterns around popular gathering spaces.

**FEATURES**
- 120v AC Replaceable LED module
- 623 lumens, 69.2 lumens/watt
- 3000K color temperature

- Dimmable to 10% with many ELV type dimmers
